

Breakfast at *Mama's Café*

In the San Cristoforo area in Milan, on the request of the two young owners Nomade Architettura has created a fresh and bright space with family atmosphere – Mama's Café. The project is focused on the elements that make up the space, such as the double height, the staircase and the important balustrade, revolutionizing the language.

The choice of light colors in shades of white, gray and natural wood successfully dialogues with the contrasting black chalkboard of the background scenic wall that represents support for the fun personalized graphics, created by Asterisco Design, where the clients find the philosophy, the mood and the offer of the place.

The transformed barrels remain perfectly integrated into the concept of the space with predominantly rustic elements.

The selection of lamps with stylized domestic lines with the slender white structure that stands out on the blackboard backdrop like a piece of chalk, further strengthens the atmosphere of genuine familiarity, from which the owners wanted the customer to feel welcomed.

Via Francesco Gonin, 56 - 20147, Milan
