Historic apartment situated in Milan, Italy, completely renovated by [Nomade Architettura Interior Design](#).

## Description by Nomade Architettura Interior Design

A renovation in an apartment in the heart of Navigli in Milan. We wanted to play with the original peculiarities of the apartment, like the original beams in the ceiling, covered until now, or the original fixtures, in contrast with a number of design strongest choices. The kitchen is enclosed in a box of iron and glass, communicating and open, but at the same time it is a room itself. The atmosphere is warm and captivating, with a special eye to design!
